THROUGH:

Acting Chief, Resources Division

SUBJECT:

Accuracy of Estimate

1. It has just been brought to my attention that R/FU's estimate of Cuban receipts of POL from the USSR for the first six months of 1964 differs by only slightly more than 4,000 m. t. from the official Cuban figures (R/FU estimated 2,524,643 m. t. compared to the official figure of 2,528,730.7 m. t.)

2. The R/FU estimate results from the compilation of data on on an all source basis by (Intelligence Assistant) in R/FU. Considering the involved follows and the mass of materials processed, I would like to commend the excellence of work to your attention.
